Marsden Eye Laser Clinic now offer the full range of refractive surgery options

We are excited to now be offering the SMILE procedure using the Zeiss Visumax technology. **SMILE (Small Incision Lenticule Extraction)** is the latest flapless technology in refractive laser eye surgery. It is minimally invasive and used to treat shortsightedness and astigmatism.

Step 1

Step 2

Step 3

With the SMILE procedure a femtosecond laser is used to create a small piece of tissue (which is called a lenticule) inside the cornea (Step 1) and then it is removed through a small laser incision (Step 2), leaving the outer cornea intact (Step 3).

Patients can expect shorter treatment times, quick visual recovery, no flap complications and excellent outcomes with high predictability.

If you have patients interested in SMILE or any refractive surgery please contact us on **(02) 9635 6964** to arrange a **complimentary consultation** for them to determine their suitability for vision correction surgery. These are available at our Parramatta, Penrith and Castle Hill rooms.

We now offer SMILE, as well as LASIK, PRK, Trans PRK, Implantable Contact Lenses, and Refractive Lens Exchange

Our Refractive Surgeons

Dr Fitzsimons began performing refractive surgery upon delivery of the first lasers into Australia in 1996. His expertise includes all aspects of refractive surgery including Photorefractive Keratectomy (PRK), LASIK, PHAKIC IOLs and Refractive Lens Exchange. He is a member of the Royal Australian College of

78th Orthoptic Australia Conference and 53rd RANZCO attended by Marsden Eye Team

The Orthoptic team from Marsden Eye Specialists attended the annual scientific congress for ophthalmologists and orthoptists in Brisbane this year. We are very proud to have 5 of our orthoptists present at this prestigious platform in front of their colleagues from around the country.

We had the biggest team presence in the entire orthoptic conference and it was great opportunity to network and catch up with our colleagues.

We look forward to seeing everyone again in Perth at the end of the year.

Updated Website

We at Marsden are continually looking to improve our services and accessibility to our patients and referrers. We are working very hard behind the scenes to ensure our website has a seamless and user-friendly interface so they can access information readily and easily

Upcoming Educational Events

Please email marsdenliaison@marsdeneye.com if you would like to know when our next educational event is and how you can be a part of it.

We have currently adopted a hybrid approach to our seminars where clinicians have the choice of attending in person, or watch our specialists talk via live stream services.

Thank You

Marsden Eye Specialists would like to thank you for entrusting your patients to our care. We have new patient appointments available every day and all urgent referrals are seen the same day by one of our specialists.

We have office locations throughout Western Sydney to provide easy access to the latest diagnostic and treatment options, as well as access to clinical trials for your patients.

Our best contact email is enquiry@marsdeneye.com
